

HOW OUR ASSET RECOVERY PROGRAM WORKS:

REDEPLOYMENT

- + Capture of all device information (part #, serial #, version #, etc.)
- + ID defective or damaged parts
- + Re-packaging and labeling will be performed per your standards delivered
- + Complete labeling and shipment to designated location
- + All information reviewed and validated by WWS Project Manager, who will function as SPOC for you

RESELL

- + Identify market value to determine if asset resale is an option
- + Identify if the equipment can be traded with WWS for equipment you need today or a credit for tomorrow
- + Calculate value of asset resale versus per site price submitted in this RFP
- + All information reviewed and validated by WWS Project Manager, who will function as SPOC for you

SCRAP

- + If selected to perform this function for relevant parts, we will ensure that all items are scrapped by an environmentally compliant facility in the United States per our standard processes
- + All information reviewed and validated by WWS Project Manager, who will function as SPOC for you
